

space for success

Jena-Optronik is one of the leading suppliers for space industry with a broad customer base and reliable partner in national and international projects: High quality awareness and well-qualified, motivated employees meet a strong future-proof technological basis in an innovative environment. The company is a market leader for state-of-the-art AOCS and single source for 3D-lidar systems and Rendezvous- and Docking Sensors.

Jena-Optronik GmbH is EN/AS 9100:2018 certified.

Looking back on 40 years of experience in optical precision instruments for space applications, Jena-Optronik is a true pioneer in the field of attitude and orbit control sensors for satellites and optical instruments for Earth observation.

During this time Jena-Optronik became a reliable partner for space agencies as well as for space companies in Asia, Russia, Europe and North America. They trust in products from Jena-Optronik and equip their top-missions with these.
