This is all us

For decades now we've been making space missions possible: enterprises that are as spectacular as they are successful. We are proud of our products, team and support for your mission.

Tradition and innovation are the basis for our work. Our home base is Jena, a town in Germany that was the home of Carl Zeiss – and a high-tech center where the art of German engineering and research meets passion and drive.

A portrait of Christoph Schmitt, a young man with short brown hair, wearing a blue polo shirt with the Jenaoptronik logo on the chest. He is sitting at a desk with a computer monitor and keyboard. The background is a blurred office setting.

CHRISTOPH
SCHMITT
Lidar Sensor Program Manager
and Systems Engineer
